PROFESSIONAL SUMMARY

Information Technology graduate and hands-on software developer with experience building full-stack web and Android applications. Skilled in Laravel, Next.js, Java, SQL, and modern web technologies. Developed and deployed real-world systems including POS, inventory management, and medical mission platforms. Seeking an opportunity to apply technical skills, continue learning, and contribute to organizational success.

EXPERIENCE

Information Technology Intern

CMO-IBA (Integrated Barangay Affairs)

January 2026 - March 2026

- Developed and delivered an inventory management system for office operations.
- Created organizational, signage, certificate, and public-service layout materials.
- Assisted in data encoding, inventory records management, and document processing.
- Supported barangay service activities while maintaining confidentiality and accuracy.

SELECTED PROJECTS

POS Management | Thesis Project - Android Application

2026

Java / Android SDK / SQLite / Supabase / Retrofit / NanoHTTPD / ZXing

- Built an offline-capable POS and inventory app with barcode scanning, product/customer management, cash and accounts receivable sales, receipts, stock tracking, returns/exchanges, and PDF reports.
- Implemented SQLite persistence, LAN host/client synchronization, queued offline transactions, Supabase-authenticated cloud backup/restore, and encrypted local preferences.

Easy Inventory Manager | Academic Activity - Web Application

2026

Laravel 12 / PHP / Tailwind CSS / PHPUnit

Live: easy-inventory-manager.site

- Developed role-based admin/staff workflows for product and user management, barcode cashiering, stock-in/out, sales receipts, dashboards, low-stock alerts, audit logs, and PDF reports.
- Used server-side validation, authorization middleware, database transactions with row locking, security headers, account lock controls, soft deletion/restore, and automated feature tests.

MissionCare Hub (Medical Mission) | Full-Stack Web Project

2026

Next.js / TypeScript / Supabase / Tailwind CSS / Vitest

Live: medical-mission-chi.vercel.app

- Created a responsive outreach platform for publishing mission activities, schedules, stories, photo galleries, proposal documents, YouTube videos, contact/support content, and editable site settings.
- Built secure admin workflows with Supabase SSR authentication and authorization, validated and rate-limited APIs, upload controls, database policies/migrations, caching, and utility tests.

TECHNICAL SKILLS

Languages: Java, PHP, TypeScript, JavaScript, SQL, HTML, CSS

Frameworks & Data: Android SDK, Laravel, Next.js, React, Supabase, SQLite, Tailwind CSS

Tools & Practices: Git, GitHub, REST APIs, Vite, PHPUnit, Vitest, responsive design, authentication/authorization, data validation, Microsoft Office

EDUCATION

Bachelor of Science in Information Technology

Ramon Magsaysay Memorial Colleges

General Santos City, Philippines
